

DISPOSAL OF YOUR LOCKERS AND/OR SEATING AT THE END OF THEIR USEFUL LIFE

Dear Prospective Customer

At the completion of your job, you will be sent this information sheet. You will be advised to keep this document with your product information for your lockers and/or seating.

Excel Lockers is a company dedicated to minimizing our effect on the environment. This is in line with our commitment to both extending the useful life of our products (refurbishing or reusing where possible) or by disassembly and responsibly reusing or recycling a large percentage of the components.

If you remove the lockers and/or seating yourself, or with the assistance of another company, please remember that many components of the lockers are able to be successfully recycled. We can provide advice on what to do with your lockers and/or seating when you no longer require them – don't hesitate to contact us if you have any questions. You may like to discuss options with us for refurbishing your products to extend their useful life.

If you'd like to discuss the possibility of refurbishing your lockers and seating, or require advice on disassembly and recycling your product, your warranty pack on job completion will provide you with our contact details.

Yours sincerely

TONY DOWNES
Director
