

ENVIRONMENTAL POLICY STATEMENT

Excel Lockers is a registered Australian Company based in Brisbane, Australia. We manufacture wooden lockers and seating systems and distribute them nationwide. Our small factories in Melbourne and Sydney are used for the purposes of storage before installation of the manufactured product in these cities. We also distribute metal lockers sourced from overseas producers.

Our Environmental Management System applies primarily to the manufacturing operations we carry out in Brisbane with our transport and installation operations also in mind. As our small factories in Melbourne and Sydney are directly under our control and management, they comply with this policy in all respects.

Excel Lockers' management and staff aim to implement an Environmental Management System that documents the steps we take to minimize the impact we have on the environment by adhering to objectives and targets

to

minimise our environmental footprint, by initiatives such the installation of LED lighting throughout Factory and investigation into solar power (renewable energy) at our manufacturing premises and

by

working with staff & other stakeholders, and where possible, suppliers who have a similar and transparent commitment to the environment

through

pollution prevention practices in our manufacturing processes. This includes, but is not limited to improvements in our Waste Disposal systems for toxic products

with

our practices in compliance with legal and other requirements

and

to be a role model for others to follow, by clearly showing a commitment to continuous improvement

Excel Lockers understands that our company has moral, legal and continuing obligations to limit our impact on the environment
